The [Finnair SkyWheel](#) opened to the public in central Helsinki at the Katajanokka Harbour, not far from where Finnair first based its flight operations in the 1920s. The observation wheel features 30 climate-controlled blue-and-white gondolas, including one special VIP cabin with a glass floor, leather seats and Veuve Clicquot Champagne service. "This summer the Finnair SkyWheel will take thousands of visitors on a scenic tour above the rooftops of Helsinki," said Jarkko Kontinen, vice president of marketing and product development, Finnair. "We are proud to be associated with Helsinki's newest landmark, which also has a special connection to our own history."
