Learning Journeys

April 24, 2013

Learning Journeys, a division of Perillo Tours, has designed six family tours throughout the world that combine outdoor adventures, culture and hands-on learning. Each itinerary includes a minimum of three educational experiences plus a Freedom of Choice Experience which allows your family to choose an adventure based on your interests. Examples include language or cooking lessons, crafts (such as mask making in Venice and kite making in India), farm visits and animal interactions (like falconry in Dubai and a bear rescue in India). Choose from the 13-Day *Italian Family Journey*, 9-day *Costa Rica Family Discovery*, 12-Day *Greek Family Yacht Adventure*, 10-Day *Arabian Family Adventure*, 10-Day *India Culture and Cubs* program and the 8-Day *Kenya Family Safari*. Tour courses range from two to four hours, providing unique opportunities for your family to broaden your horizon while immersing yourself in local culture and cuisine.
